Volunteer Briefing: Knowledge Packs

Summary

We introduced Knowledge Packs at the beginning of 2014, but just in case you missed the communications, or are uncertain about what they are, please see the information and links below.

What is a Knowledge Pack?

A Knowledge Pack is a collection of credits that offers a flexible way for you to access the IET Digital Library, to download journal and conference articles and eBook chapters.

What are the benefits?

As an IET member you can now enjoy access to this valuable knowledge for your own research and CPD, whenever you need it.

As part of the membership benefit, you will receive five free credits to download content from the Digital Library on 1 January every year, with the opportunity to purchase additional credits throughout the year, allowing more downloads.

What is the Digital Library?

The Digital Library is global repository of high-quality science, engineering and technology content that holds over 190,000 technical documents, including nearly 400 eBooks, over 1,300 conference publications, and over 70,000 journal articles.

Promotional flyer

If you would like to promote Knowledge Packs, a flyer is available to order from the Marketing Toolkit. Although the flyer primarily focusses on the member benefit of free credits, it's worth mentioning that this product is available to non-members as well.

If you have any questions please email ietdl@theiet.org.
